Education

National Institute Of Technology, Warangal **2022 – 2026**
B.Tech(EEE)

Delhi Public School, Vidyut Nagar, Uttar Pradesh **2020 – 2021**
Class XII, Central Board of Secondary Education (CBSE)

Delhi Public School, Vidyut Nagar, Uttar Pradesh **2018 – 2019**
Class X, Central Board of Secondary Education (CBSE)

Relevant Coursework

- Data Structures and Algorithms
- Program Solving Skills and Computer Programming
- Python Programming
- Internet of Things

Experience

ICICI Prudential Life Insurance Company **July 2026 – Present**
Software Developer *Mumbai, India*

- Developed a full-stack Digital Trust Passport System using Java, Spring Boot, and React.js, supporting user onboarding, trust profiles, digital passports, and verification workflows.
- Built **REST APIs** using Spring Boot and Spring Data JPA for user management, role assignments, skill and achievement tracking, and verification approvals.
- Implemented **JWT access/refresh token authentication** and role-based authorization using Spring Security to secure APIs across Individual, Verifier, and Admin roles.
- Integrated **AES-256-GCM payload encryption** using browser Web Crypto APIs and custom Spring Boot filters for encrypted request/response processing.
- Built role-specific dashboards with **React, Context API, protected routes, and Axios interceptors**, integrating frontend workflows with secured backend services.

Projects

Drug Toxicity Predictor. | *React.Js, FastAPI* **Apr 2025 – Jul 2025**

- Developed a toxicity prediction model using **SMILES** chemical structures.
- Achieved **90%** accuracy using **TensorFlow** and **Keras**
- Built a production-ready frontend with **Next.js** + **Tailwind CSS**.
- Integrated inference pipeline with backend APIs.

LoadLens. (ML Load Forecasting App) | *Python, Streamlit* **May 2024 – Jul 2024**

- Implemented GRU-based load forecasting using **TensorFlow** and **Streamlit**
- Added dynamic training, retraining, error analysis, and visualization dashboards.
- Deployed using Streamlit with CI-friendly code architecture.

URL Shortener. | *FastAPI, Redis, MongoDB* **Jun 2024 - Jul 2024**

- Built a high-performance URL shortening service using **FastAPI** with clean, modular architecture.
- Implemented **Redis** caching for ultra-fast redirects, reducing lookup latency by **10x**.
- Designed **MongoDB** schemas for storing URLs and click analytics.
- Added rate limiting and unique hash generation.

Technical Skills and Interests

Languages: C++, Java, JavaScript, Python
Developer Tools: Git, Vite, Z Shell
Frameworks: Spring Boot, React.js, Tensorflow, Streamlit
Cloud/Databases: MySQL, Oracle DB, MongoDB, Redis, Firebase
Soft Skills: Problem Solving Skills, Time Management, Positive Thinking
Areas of Interest: Web Development, Machine Learning

Achievements

Open-Source Contributor HacktoberFest 2024 (ServiceNow Slacker Bot) **Oct 2024**
LeetCode Rating Ranked in the Top 19% globally on LeetCode **Jul 2025**
Codeforces Rating Ranked in the Top 38% globally on Codeforces **Oct 2025**
Finalist at BYTE Innovation Garage, NIT Warangal **Mar 2023**
